Only the newest, most innovative products can meet the challenges in today's market. Bergquist brings the best of these products to you from around the globe. From massive plant equipment to the latest in residential design, we know high quality and high efficiency are a must. Our propane equipment veterans will help you identify the critical issues for your job, so that all the costs; long-term and short-term, are hammered out. We are ready to make precise recommendations as to your heating needs, and we welcome your call at anytime.

In addition, on the next page, we offer the **Bergquist BTU Calculator.** This will help estimate the size of the units(s) you need. Every heater in our book is accompanied by its' BTU performance number. Just plug that number into the chart and you will have a good idea of the BTUs required for any job. It is also available on our web site as a free PDF download (www.bergquistinc.com/tools.html).

New for this year, Bergquist introduces the **Rapid Stock Program**. Hot seasonal items that you need a quick turnaround on are designated with the RSP icon. Only items not designated as Rapid Stock will be limited in quantities or as special order items.

RAPID STOCK

This year, Bergquist is proud to be celebrating its' 44th year serving our friends in the propane industry. We offer overnight nationwide service from 2 distribution hubs and information and advice from 5 locations throughout the Midwest.

Inside **Bergquist Heater 2006-2007** you will find information in-depth about the fine products we sell. Also available are our comprehensive parts catalogs **Bergquist 2006** and a special, seasonal **Bergquist Outdoor.** You can order these catalogs free by calling 1 800 537 7518.

The world's top heating brands are ready to be shipped nationwide from Bergquist's two distributions centers. We stock over 12,000 essential items.

Decades of propane equipment experience mean your order goes out right - and right away!

On the Cover:
Vanguard creates the ultimate in outdoor comfort with the new BISTRO heater. It's a 24" diameter, bar height table. Radiant burner radiates heat 360°. Operates from a 20lb. LP cylinder. Adjustable heat output. Integrated wheels for easy mobility. To order call: 1 800 537 7518.

Bergquist BTU Calculator

The following formula is used to determine the BTUs needed to heat a building. This calculation would be for an average uninsulated building. Add more BTU's if the building will have a great deal of heat loss from open windows and doors. Reduce the BTU's if the building is well insulated and weathertight.

Cubic feet to be heated* X .133 X desired temperature rise** = BTU's/hour

* Cubic feet to be heated... Multiply the length times the width times the height of the area to be heated.
**Desired temperature rise... Subtract the lowest expected ouside temperature from the desired inside temperature.

BUILDING HEAT CALCULATOR

EXAMPLE: A concrete block building 50 feet wide by 200 feet long with 20 feet from floor to ceiling. All window and door openings are temporarily covered with plastic. The outside temperature is 15° and we want the inside temperature to be 55°.

Cubic feet = 50 x 200 x 20 = 200,000 cubic feet
Temperature rise = 55°–15° = 40°
BTU's needed: 200,000 x .133 x 40 = 1,064,000 BTU's per hour

Bergquist heaters needed: We recommend four 250,000 BTU convection heaters or three 375,000 BTU forced air heaters to heat this job.

PORTABLE PROPANE HEAT CALCULATOR

BTU SIZING

_____ (Cubic ft.) X .133 X _____ (Temperature rise) = _____ (BTU's needed)

HEATERS NEEDED

_____ (BTU's needed) + _____ (BTU output of heater to be used) = _____ (Number of heaters needed)

FUEL LOAD - GALLONS PER DAY

_____ (Number of heaters) X _____ (BTU output of heaters) X _____ (Number of hours used per day) ÷ 91,000 = _____ (Gallons of LP per day)

FUEL LOAD - POUNDS PER DAY

_____ (Number of heaters) X _____ (BTU output of heaters) X _____ (Number of hours used per day) ÷ 21,000 = _____ (lbs. of LP gas per day)

Parchment	3	UMTE-42-P	181.00

These mantels include panels that fit the fireboxes listed in the chart without cutting.

These mantels also have sliding panels that allow the mantel opening to adjust from 43 to 51 inches wide and from 33 3/4 to 41 1/4 inches tall by cutting the sliding panels for each side to the proper firebox height.

NOTE: Because our 42 Universal Mantel measures more than six feet across and almost five feet tall, most rooms will not accommodate the additional space required for a mantel base or for a corner mantel. Therefore, these items are not offered.

Fits these units without cutting sliding panels	
Breckenridge	Tahoe

Oxford Cast Iron Gas Stove Heaters

• Vanguard's Cast Iron Gas Stoves bring you the attractiveness of a vintage era wood burning stove, combined with the economy, convenience, comfort and efficiency of gas space heat. • Stove cabinets are offered with porcelain enamel or a paint finish. Porcelain models are offered in sand, teal green, black and red, while the painted model is offered in charcoal. • Stoves feature an opening door, raised detailing, curved legs, and a door to conceal controls.

Model Part No.	Oxford Cast Iron Stove Heaters Description	Shipping Weights	List Price
VCISB	Cast Iron Stove, Charcoal paint	198.0 lbs.	$ 778.00
PVCISB	Cast Iron Stove, Black Porcelain Enamel Finish	198.0 lbs.	957.00
PVCISG	Cast Iron Stove, Teal Green Porcelain Enamel Finish	198.0 lbs.	957.00
PVCISR	Cast Iron Stove, Red Porcelain Enamel Finish	198.0 lbs.	957.00
PVCISS	Cast Iron Stove, Sand Porcelain Enamel Finish	198.0 lbs.	957.00

Note: Stoves must be paired with one of the Vent-Free, Direct-Vent or B-Vent Gas Burner Systems shown below. Simply fasten burner system, connect gas (and venting where applicable) and install stove back where applicable.

The Oxford Boasts A Large Fire Viewing Area And Operable Doors

Burner Systems For Cast Iron Stoves

• The burner systems for the Cast Iron Stoves are purchased separately. They are offered in both natural and propane models with remote "ready" controls: The controls are concealed behind a door. • These remote "ready" models can be paired with any of the optional remote controls.

ELECTRIC HEARTH

*Indicates not a Rapid Stock item.

Unlike most electric fireplaces, Vanguard Premium models look terrific whether they are on or off. Available in 4 sizes: 21", 26", 32", 36" and one stove. Standard features include adjustable light intensity and flame speed, rolled louvers, texture powder coat finish, and elegant glass front. The 36" model also includes solid, full-length side nailing flanges, and drywall stops.

Vanguard Direct-Vent Gas Fireplace Systems

Vanguard's new Direct-Vent Fireplaces share the same uniform sizing with our wood and B-Vent fireplaces. They feature beautiful new combination split oak ceramic fiber logs, multi-tiered flame patterns and glowing ember beds. All models (except Peninsula and See-Thru) are heater rated and built on the proven strengths of the 45° slant back design and hinged tool-less entry glass door for painless installation, operation and maintenance. We've made all models easily fuel convertible in the field, and millivolt units feature an adjustable flame control. All units are texture powder coated, and include an arch window, hidden screen pockets, flex gas line, shut-off valve and pre-wired electrical "J" box to ensure quality, performance, safety and convenience.

C.S.A. APPROVED ANSI Z21.88/C.S.A 2.33

The Value Line is available in 32" and 36" models

The Performance Line is available in 36" and 42" models

PREMIUM LINE SERIES

Fully featured and truly impressive the Premium series raises the bar for direct-vent fireplaces. They feature a high end log and burner presentation with a deep glowing ember bed. The standard real brick interiors and heavy cast iron grate finish the custom look. The beautiful ceramic fire log set is unitized to ensure a perfect set up every time. As with all Vanguard direct-vents (except the VCD Series), the flex connector, shut off valve and pre-wired electrical "J" box are standard. We even connect the millivolt wall switch to the remote ready adjustable control valve for fast and reliable installations.

Btu Range: VKC36N (23,000-33,000 Btu), VKC36P (22,000-31,000 Btu), VKC42N (27,000-38,000 Btu), VKC42P (25,000-36,000 Btu) Venting system: 5" - 8" (all models)

B-Vent Gas Fireplace Systems

Beautiful split refractory log sets above deep glowing ember beds highlight the new "B"-Vent models. They offer the flexibility of accessing the gas controls through either the lower face panel or inside refractory floor to allow installation of a full face surround. All models feature positive lock outside air mechanisms, flex gas line, and pre-wired electrical "J" box. All units are shipped set up for natural gas but easily convert to propane in the field.

C.S.A. APPROVED ANSI Z21.50/C.S.A 2.22

RAPID STOCK

VALUE & PERFORMANCE LINE

The Value Line Series B-Vent Fireplaces offer a 15,000 Btu model with a single tube burner and 4" venting, while the Performance Line offers 25,000 Btu with 5" venting and full ember bed. Both models feature beautiful new multidimensional gas log sets with glowing embers.

Model Part No.	Value Line B-Vent Fireplaces Description	Shipping Weights	List Price
*VP3241	32" Natural Gas Smooth Faced B-Vent Fireplace w/ Millivolt Ignition	72.0 lbs.	$ 526.00

Wood Burning Fireplaces

RAPID STOCK

Vanguard is proud to introduce our new line of standard wood burning fireplaces. The Vanguard wood line is offered in Value, Performance and Premium models. Fireplaces range in size from 36" to 50" allowing for generous viewing areas. Homeowners will appreciate the many added features. All units come complete with a solid steel grate, refractory firebrick liner, black chain mesh fire-screen and textured charcoal powder coat finish. Installers will appreciate the full length nailing flange, dry wall stops and the pre-wired "J" box.

VALUE LINE SERIES – 36" & 42"

Although surprisingly economical the Value Line Fireplaces present an attractive "Big Box" look. These units are available in circulating (louvered) or non-circulating (smooth faced). They also come with the option of full insulation. Our 8" pipe makes installation a snap with clearances of 1" for 36" and 2" for 42" models.

Model Part No.	Value Line Wood Burning Fireplaces (uses 8" pipe system) Description	Shipping Weights	List Price
*VB361	36" Non-Circulating Smooth Faced, Wood Burning Fireplace	150.0 lbs.	$ 162.00
*VB361I	36" Non-Circulating Smooth Faced, Wood Burning Fireplace with Full Insulation	150.0 lbs.	192.00

*VB36LI1	36" Circulating, Wood Burning Fireplace with Stamped louvers and Full Insulation	150.0 lbs.	192.00
*VB421	42" Non-Circulating Smooth Faced, Wood Burning Fireplace	180.0 lbs.	328.00
*VB42I1	42" Non-Circulating Smooth Faced, Wood Burning Fireplace with Full Insulation	180.0 lbs.	357.00
*VB42L1	42" Circulating, Wood Burning Fireplace with Stamped louvers	180.0 lbs.	328.00
*VB42LI1	42" Circulating, Wood Burning Fireplace with Stamped louvers and Full Insulation	180.0 lbs.	357.00

Value Line Wood Burning Fireplace

PERFORMANCE LINE SERIES – 36" & 42"

The Performance Line of wood burners is the foundation of Vanguard's new family of fireplaces. These units come standard with easy access damper, outside air control, hidden screen pockets and are easily convertible from smooth face to circulating. You also have the option of full insulation with a herringbone refractory. Not only are these units "Gas Log Ready" they are "Gas Log Friendly". Meaning you can keep the look of a masonry fireplace by having hidden gas piping and controls. Required venting is 8" pipe with minimum clearances of 1" for 36" and 2" for 42" models for clean, space saving installations.

Wood Burning Fireplaces, *continued*

PREMIUM LINE SERIES – 42" & 50"

The charm of the Premium Line is its trueness to a masonry fireplace. With its brick to face opening all sheet metal is concealed giving you the most realistic masonry look achievable. They are available only in smooth face to achieve this look. These units come standard with full insulation, easy access damper and outside air control. You may also choose a unit with a herringbone refractory. As with the Performance Line this unit is "Gas Log Friendly" allowing for hidden gas piping and controls. Required venting is 12" pipe with minimum clearances of 2" for 36", 42" and 50" models.

Premium Masonry Fireplaces are available in 36", 42" and 50" models

Multi-View Wood Fireplaces

MULTI-VIEW

Multi-View Fireboxes are available in See-Thru, Peninsula and Corner models. The See-Thru allows you to enjoy the beauty of the same fireplace from two rooms. This unit is ideal for either new construction or an addition to an existing wall. The Peninsula Fireplace is a perfect match for a custom home or office. This model is equally beautiful when viewed from any of the three open sides. Vanguard's Corner Fireplace is the perfect space saver model. These units, available in both left and right facing fireplaces, will blend into any open cornered wall or can be incorporated into room dividers. These unique designs offer a full 180° fireplace viewing area. All models can be customized with glass door kits and outside air kits.

Outdoor Wood Burning Fireplaces

These fireplaces are dressed up in stainless steel with realistic textured brick liners available in either natural white or warm red and hidden screen pockets. An EZ access damper and gas log ready feature also comes standard. All models feature clean, brushed stainless faces with stainless mesh screens and full length nailing flanged drywall stops. Required venting is 8" for both 36" and 42" models for easy, space-saving installation.

ENERCO GARAGE / SHOP HEATERS

Turn up the heat...in your garage!
Enerco's natural or propane gas fired, AGA approved, infrared garage / shop heater brings the sun indoors. Just like the sun's radiant energy, the heat from an Enerco garage/ shop heater radiates heat to floor level objects which in turn heat surrounding air to the desired temperature. Manufactured to meet the special needs of garages and small shops. All necessary brackets, hardware and thermosat are included. No electricity required; simply run gas line and make your garage a workshop year 'round.

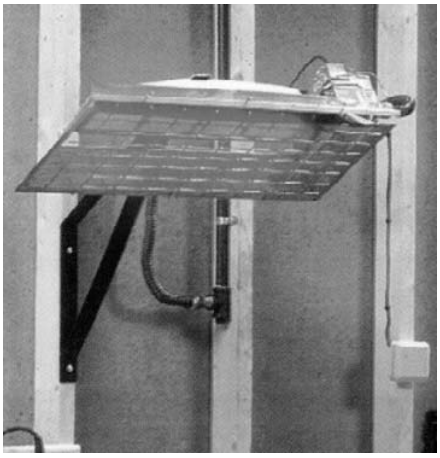
H22L	Propane 22,000			

Warranty...1 year on gas control, 5 years on the burner.

Great for garages, utility shops, storage sheds, patios, auto repair shops, farm buildings. Inexpensive to operate, maintenance free. (Natural & Propane Gas).



Enerco
H25N, H22L Series Garage and Shop Heater

RAPID STOCK

HEATSTAR BY ENERCO LOW-INTENSITY GARAGE / SHOP TUBE STYLE HEATER

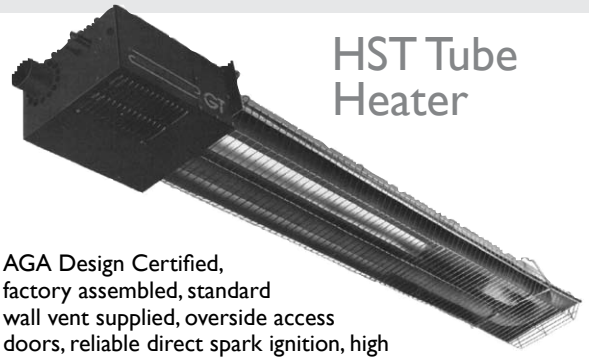
New, low-intensity gas-fired infrared heater for residential garages and small shops. Enerco heaters have kept thousands of commercial and industrial buildings warm for over 30 years.

Ideal for garages and small shops

The HST series radient tube heater is ideal for residential garages or garage workshops, because infrared heat operates like the sun - directly warming floors, people and objects, NOT AIR. Just like the sun's radiant energy, the heat from an Enerco garage/shop heater radiates heat to floor-level objects which in turn heat surrounding air to the desired temperature.

Clear, quiet, draft-free

Unlike forced air heaters, the HST series provides quiet, draft-free heat. Dirt and dust particles are not blown around, keeping work areas clean.



HST Tube Heater

AGA Design Certified, factory assembled, standard wall vent supplied, overside access doors, reliable direct spark ignition, high efficiency motor, and thermostat included. (Natural & Propane Gas).
Design features:
• Short overall lengths - compact solution for warmth in hard-to-heat areas. • ceiling mounted - frees valuable work space. • Balance flue - 3" exhaust flue duct inside 5" combustion air inlet duct means only one hole in the wall or roof. • Aluminum reflector - deep dish style maximizes energy reflection, minimizes heat loss. • Protective grill.

Quiet operation, easily heats 2 and 3 car garages.

ENERCO HIGH INTENSITY INFRA-RED UNVENTED HEATERS

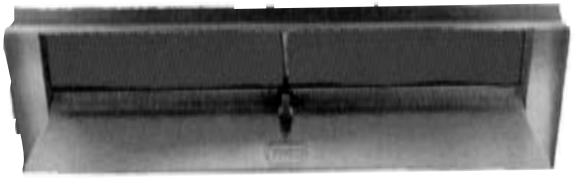
Space'n Spot Heaters

Enerco 4000 Series

40,000 Btu. For use in low profile buildings with ceilings 10' to 15'. (Natural & Propane Gas).

Enerco 8000 Series

For use in high profile buildings with ceilings 16' to 20' (Natural & Propane Gas).



Enerco 9000S and 9000 Series

For use in ultra-high buildings with ceilings 18' to 24' or 24' and higher above floor level respectively. (Natural & Propane Gas).

Additional features;
- High-efficiency primary ceramic grids
- Heavy alloy mesh reverberator grids
- Aluminum reflectors for maximum reflectivity
- Stainless steel burner housings.

Puts all of the heat at the working level

Heaters transmit radiant comfort without heating intervening air. Floors, walls and machinery are warmed and, in turn, re-radiate heat. Fuel costs are minimized as Enerco infra-red combines radiation, convection and conduction heating.

Low first cost.

Enerco heaters are easily suspended from most building super-structures, and are installed without direct venting. Units can be mounted to walls, from joists over aisles, and near dock openings where heat losses can cause discomfort.

Reduce heating costs by 50% and more.

Units directly warm building contents, including people. Compared to forced air systems in which rising warm air is trapped at ceiling level, infra-red heaters beam energy down to create floor-level comfort. Fans and blowers are eliminated, reducing electrical energy costs by almost 90%.

Reduce upkeep.

Efficient operation reduces maintenance. With no moving parts to wear, service routines are all but eliminated.

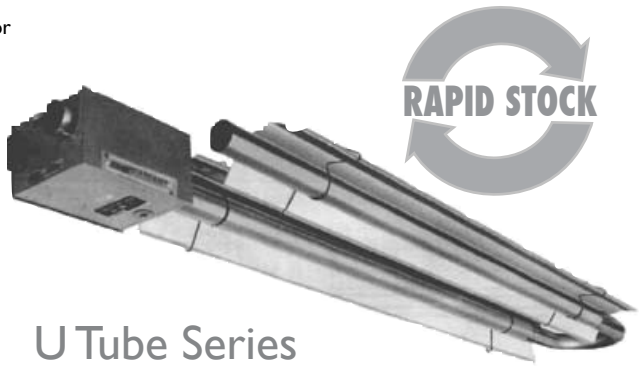
Enerco Energy Saving Radiant Tube Heating Systems

Energy Saving Radiant Tube Heating System
Enerco, a pioneer in the infrared heating industry, recognized the need for a heater that could be used in buildings with lower ceiling heights. Also, with the trend towards tighter construction, lower heat losses and the addition of insulation to existing structures, a new heater design was necessary. The EnerRadiant XL Tube System provides the solution by satisfying all comfort requirements while still providing the desired efficiency.

- The XL series features a Honeywell Smart Valve II® which combines the gas valve and ignition control into one single unit.
- All components are name-brand non-proprietary and available through local distributors.
- All natural gas units include an LP gas conversion kit.
- Available in 60, 80, 100, 125, 150, 175,000 Btu/hr capacities.
- 20 to 60 foot system lengths.
- Install as "U-Tube" or "L" configuration with optional kits.
- Hanger design allows horizontal or 45 degree angle of reflectors
- Vent adapter included.

Typical Applications
Manufacturing plants, truck terminals, repair shops and garages, warehouses, aircraft hangers, fire stations, automobile dealership and body shops, loading docks, farm buildings, indoor sporting arenas, stables and many others are common applications for Enerco radiant tube heaters.

Straight Tube Series



U Tube Series

Use part # F106414 to convert straight tubes to U-tube configuration.
L-Tube configurations also available - contact your sales rep. for additional information on the "L" configuration.

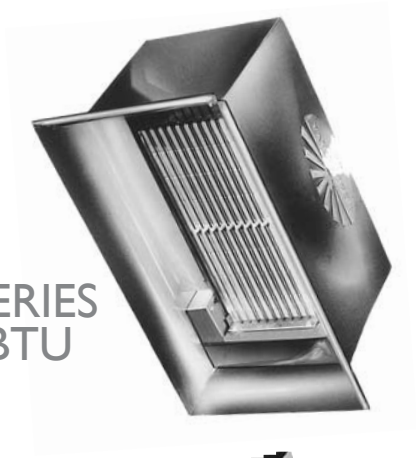
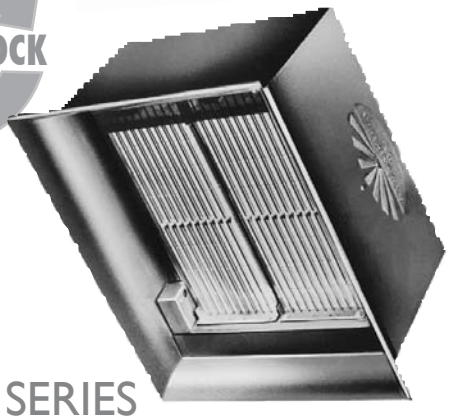
DETROIT RADIANT DR SERIES HIGH INTENSITY INFRA-RED UNVENTED HEATERS

Gas Fired, High Intensity Infra-Red Heaters



DR30 SERIES
30,000 BTU

RAPID STOCK



DR60 SERIES
60,000 BTU

DR160 SERIES
160,000 BTU

Features
- Ceramic high temp. infrared generator
- Stainless steel rods
- Concealed pilot
- Bright polished alum. reflector
- Lower installation cost through compact modular heater design
- Solid radiation area over 68%

DR Series
The DR Series is a high intensity unvented heater. Typical applications include aircraft hangers, warehouses, and high ceiling industrial buildings. The DR Series is commonly used in areas with high air infiltration, high ceilings, and/or spot heating applications. These are very economical heaters. The DR Series is available in a multitude of configurations, ranging from 30,000 to 160,000 Btu with 9 different control options.
Every installation has its own particular obstacles to overcome - whether its unique functional or structural requirements, there is a DR Series heater for your application.

Common Applications:
Fire stations, Aircraft hangers, Auto service centers, Hockey rinks, Farm buildings, Showrooms, Factories, Loading docks, Swimming pool areas, Truck terminals

Recommended accessories for NFS, PFS, PMV-2 & NMV-2 models ; DR chain set, FC24SS - stainless steel 24" flex line, gas shutoff cock. For NFS or PFS models the ETFS1(120 volt thermostat).

5 year limited ceramic burner head warranty.
1 year standard warranty on all control components.

Bergquist

50,000 to 200,000 Btu & from 20' to 60' in length and can be "U" or "L" shaped.

The RE-VERBER-RAY XTS SERIES Infra-Red Tube Heaters offer more than fuel economy. This series of heaters has quality features not offered by other manufacturers in this class of equipment. The heater is available in natural or propane gas, 50 to 200 MBTU/H, 20 to 60 foot lengths and can be configured into a "U" or "L" shaped heater.

XTS Series quality features
- reliable 100% glo-bar ignition
- combustion heat exchanger
- high temperature black coating
- no need for draft hood
- dual differential pressure switches
- sight glass included
- fixed air metering orifice
- radiant tubes
- turbulator baffle
- independent reflectors (with end caps)
- enclosed construction
- 0° to 45° mounting angle
- optional outside combustion air
- CSA design certified
- 3 year warranty on combustion chamber/heat exchanger
- 5 year warranty on stainless steel burner
- versatile selection

"U" & "L" shaped heaters

TF1B allows for configuration into a U-shaped heater

REP is the optional reflector and 90° elbow for "L" shaped systems.

TF1B - "U" bend

RU - Reflector for "U" bend

E6 - 90° 16 gauge elbow

RE - Reflector for E6

Recommended options;
THCS - chain kit
FC-24SS - stainless steel 24" flex line
ETS5S1 - 120 volt thermostat
Appliance adapter
SWD4 - Highwind cap

3 year warranty on combustion chamber/heat exchanger
5 year warranty on burner

The XTS Series is a quality single stage tube heater

DETROIT RADIANT DR SERIES HIGH INTENSITY INFRA-RED UNVENTED HEATERS

DX-2 SERIES
50,000 TO
200,000 BTU
20° to 80°

RAPID STOCK

The DX-2 Series offers superior low intensity heat, performance and longevity.

The RE-VERBER-RAY DX-2 Series Infra-Red Heaters offer more than superior fuel economy. Quality construction and operational features assure the RE-VERBER-RAY system installed today will continue to provide fuel economy and effective heating for many years into the future. RE-VERBER-RAY quality performance, design and construction are unsrupassed anywhere.

The secret of the DX-2 Series is its burner design and application. Not only does this burner deliver up to 200,000 BTU/H efficiently, it solves two of the inherent design problems found in older technology infra-red tube heaters. First, unlike other systems that transfer the majority of their heat in the first ten foot section of emitter, the DX-2 Series delivers more even heat along the emitter length. Secondly, even at 200,000 BTU/H, the DX-2 Series operation is extremely quiet. The soft, even heat of the DX-2 Series is the primary indication that the units are operating.

Features:

- Air inlet collar standard
- Available in 220V, CE approved models
- Bolted clamps provided for superior clamping at the tube connections
- Circuit board located out of airstream
- Enameled control box
- Exclusively designed turbulator baffle insures optimal thermal efficiency
- Externally located operational/diagnostic indicator lights
- Glo-bar may be changed without tools
- Independent flame rod for sensing operation
- Inputs of 50, 60, 75, 100, 125, 150, 175, & 200,000 Btu/H
- Model lengths of 20, 30, 40, 50, 60, 70, & 80 feet
- Optional "U" & "L" configurations
- Overlapping slip-fit tube connections
- Potted (waterproof) circuit board standard
- Pre-purge standard & integral part of the control
- Pressure switch mounting brackets
- Reflector unit-rattle springs included
- Reflector end caps are standard
- Sight glass allows visual inspection of ignitor & burner operation
- Solid state ignition system
- Stainless steel burner - covered by a 10 year limited warranty
- Two foot stainless steel flex connector standard
- Two safety differential pressure switches to separately monitor air inlet & exhaust
- Units may be single or dual vented, thru the sidewall or roof
- 16Ga. aluminized steel radiant emitter tube with corrosion resistant high emissive black coating, covered by a 5 year limited warranty

Industrial Unit Heaters

Reznor® Series 100, Model F gas-fired, gravity-vented unit heaters are designed for 80% thermal efficiency and are designed for use with natural or propane gas, as specified, in sizes from 25,000 to 400,000 BTUH gas input. Model F unit heaters are designed for ceiling suspensionwith a propeller fan for air delivery. Standard features include a manual match-lit pilot with 100% shutoff and a single-stage, 24-volt gas valve. A terminal strip connector facilitates field connection to a remote 24-volt thermostat for automatic operation. Each unit is provided with a fan control and all required limit safety controls, including an energy cutoff (ECO) device and a blocked vent switch. These units are approved for installation in The United States and Canada by the Canadian Standards Association (CSA).

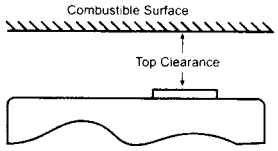
*For U.S. installations, ratings for altitudes to 2000 ft. Above 2000 ft, derate by orifice change, 4% for each 1000 ft above sea level.
*For Canadian installations, ratings for altitudes to 2000 ft. High altitude units (2001-4500 ft) are derated by 10% of maximum input.
**Gas connection for propane is 1/2" for all sizes. Sizes shown are for gas connection to a single-stage gas valve; NOT gas supply line size.
***Additional mounting heights shown later in this catalog.
****All other information in this table is based on a heater equipped with a standard 115v motor. (The standard motor for a Model 25 is an enclosed motor; all other standard motors are open motors. Optional enclosed motors are available in 115v only.)

Required Clearances (inches)

Sizes	Top *	Flue Connector	Sides	Bottom **	Rear ***
25-125	2	6	18	12	24
165-400	6	6	18	12	24

*Measure top clearance as illustrated →



**When supplied with optional downturn nozzle, bottom clearance is 42". For service purposes on standard units, bottom clearance exceeding 12" minimum is not required but may be desirable.
***For service purposes only, rear must have 24" clearance.

FLAME ENGINEERING RED DRAGON "HOT BOX" CONSTRUCTION HEATER

The "Hot Box" is one of the most unique and effective construction heaters on the market today. Built low to the ground so it won't tip, the CH220 is stable in use, stackable in storage. Heat is deflected downward and as a result more working space is warmed. In addition, the rectangular shape provides more radiating surface than most cylindrical heaters. At the end of the season just stack and store to save valuable storage area.

The piezo electronic and flame adjustment valve are easy to reach and a heat shield protect hands from high temperatures during operation. One bolt holds burner and controls into place for easy removal. Completely assembled and tested when shipped.

CH220 Series
200.00 BTU

- Durable construction
- 16 gauge metal frame
- Easy access controls
- High pressure preset regulator
- Safety excess flow POL
- Thermocouple safety control
- Piezo electronic ignitor
- Available with 10.25' or 50' UL LB120

Strong, Stackable in Storage!

Model	**CH220 w/ 10' of hose**
BTU/Hr.	200,000
Weight (lbs.)	49.3
Dinmensions WxHxD	22 1/2" x16 1/2" x 26"

*Also available with 25' hose

Warranty: Flame Engineering warrants all our goods to be free of defects in material and workmanship and will repair or replace defective merchandise that has been returned upon aurthorization. Do not return goods without consent. Warranty does not apply to items that have been altered or subjected to misuse or negligence.

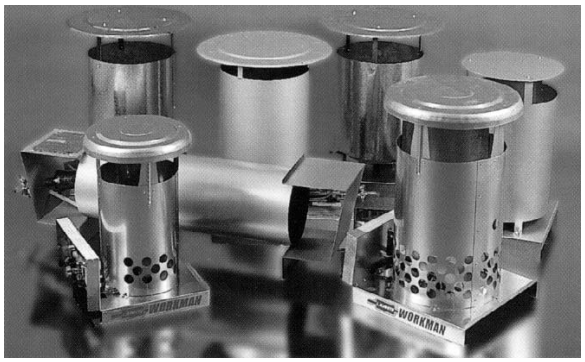
L.B. WHITE WORKMAN / NORSEMAN TRADESMAN SERIES CONSTRUCTION HEATERS



Highly portable heat that doesn't require electricity

Workman/Norseman Series & Heavy Duty
Are ideal for new construction sites where electricity may not be available, drying plaster or keeping an area warm overnight. They are easy to use, highly efficient heat at a great price. With the broadest range of propane heaters available (natural gas units available - Special Order). L.B. White also offers you a choice between the lightweight WORKMAN line and several heavy duty models from the Norseman line. Both the WORKMAN and NORSEMAN feature models certified by the CSA - not only for meeting strict national standards for safety and dependability, but also for safe use on wooden floors.

All L.B. White convection heaters include proven standard or direct spark piezo pilot light systems for fast and easy ignition, and are available in a range of heat outputs from 100,000 to 400,000 Btu, as well as propane and natural gas. And if your needs include floor level heating, L.B. White provides an efficient, horizontal model.

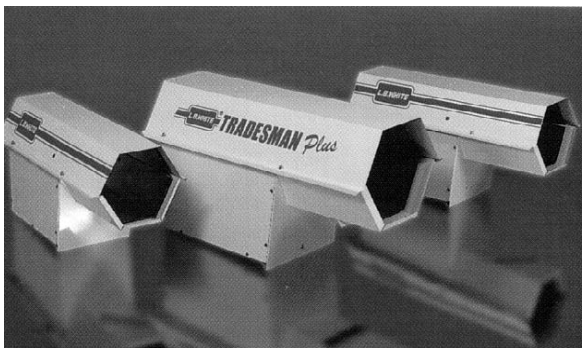
TRADESMAN SERIES



For efficient, portable, high-volume construction heat

One of the most efficient, high-volume heating lines available to the construction market. L.B. White gives you the self-diagnostic Tradesman Plus Portable Forced Air Heater, in addition to the competitive Tradesman line.
All L.B. White Tradesman heaters offer you power and flexibility when you need dependable, economical high-volume heat. Tradesman PFA heaters are engineered with solid state electronic ignition for sure starts, standard or optional thermostatic controls for consistent warmth, and built-in safety features.

The Tradesman Series portable forced air heaters are engineered to deliver high heat output with the ability to move large volumes of air. Tradesman features solid state electronic ignition for sure starts, standard or optional thermostatic controls, and built-in safety features.
With L.B. White, you select the Tradesman that matches your job requirements. Choose from a range of fixed and variable heat outputs. And Tradesman heaters arrive pre-assembled so they're ready to use.

L. B. WHITE PREMIER DUCTIBLE UNIT HEATERS

Premier 350DF Dual Fuel Ductable Unit Heater

The L. B. White Premier 350DF heater has all the great features of the Premier heater line with the added bounus of dual fuel capability. It's perfect for construction enviroments where there is a need to switch from propane to natural gas as the project progresses. Simply turn the fuel selector valve to 'Select LPG or NG'.

L.B. White ductable unit heaters are easy to set up and ever easier to operate. The heaters use L.B. White's direct spark ignition system for dependable start up. Just place the toggle switch to heat, set the thermostat, and the Premium heaters will do the rest. A remote thermostat with a 20' cord allows easy temperature adjustment whether the heater is inside or outside.

Air Distribution Options
Diffusers allow you to place the heaters outside with a wide register that distributes the air at ground level. Two separate diffuser styles allow for different uses. A Unit Diffuser fits on the unit, while the Duct Diffuser is used in combination with flexible ducting. Both diffusers allow you to place the heater outside and distribute the heated air inside. The 12' long, 12" diameter (18" diameter for the 35) duct allows you to place the heater further away, and compresses to a convenient 3' length for storage and transportation.

DETROIT RADIANT RE-VERBER-RAY INRA-RED UTILITY HEATERS

Construction Projects, Drilling Sites, Storage Areas, Service Drives, Ship Yards, Marinas, Emergency, Loading Docks, Unheated Buildings, Receiving/ Shipping, Bus Terminals, Car Washes, Warehouses, Garages.

Features;
- Rugged ceramic burner
- Highly polished aluminum reflector
- Select, high temperature stainless steel alloy protective rods,
- Adjustable LP cylinder mounting bracket
- UL listed single - tank pressure regulator
- Excess flow check POL fitting
- CSA listed 100% shutoff safety gas valve.
- Main burner flame sensor
- 90 day limited warranty

Minimum maintenance is assured: Completely rust and corrosion resistant...no moving parts. In excessive drafts, shrouding may be required. Patented Safety Tip-Over Check. Ball check at orifice shuts off gas in unit in event heater falls over from ground thawing, negligence, animal or object striking heater. Not for residential use.

Warranty: 90 day limited warranty

LP cylinders not included

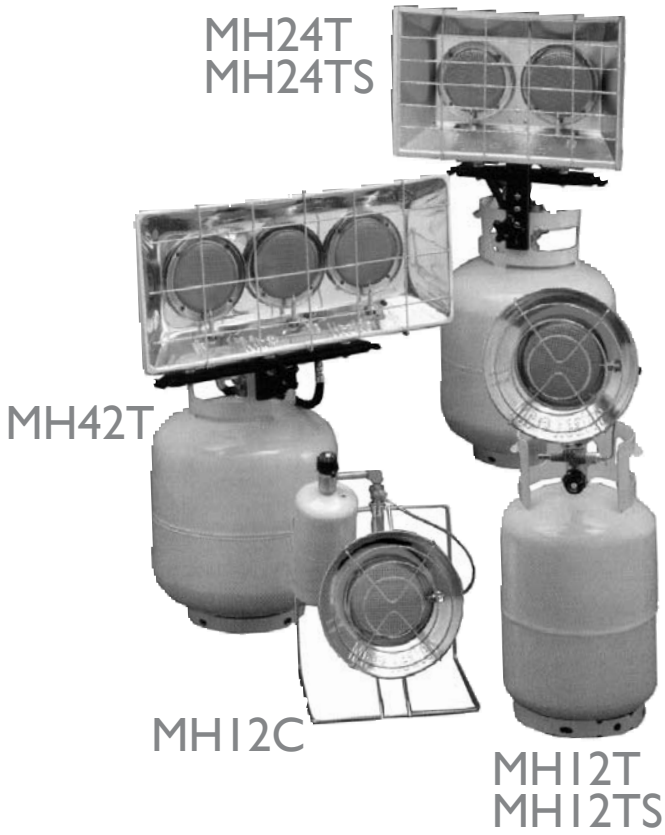
P16T 16,000 BTU

This compact, light-weight nodel will operate for thirty (30) hours on a 20 lb. propane cylinder. Weighs just 11 lbs. and features patented tip-over check.

P32T 32,000 BTU

This model weights only 14 lbs. and will operate for fifteen (15) hours on a 20 lb. propane cylinder. It's high Btu output and weight make it truly versatileportable heater. Features patented tip-over check.

MR. HEATER PORTABLE SPORTS UTILITY INFRA-RED HEATERS



Designed for outdoor use only. Cylinders not included.

Mr. Heater/Cooker - MH12C - Variable output of 8, 12 & 14,000 Btu. Can be used as a heater or portable stove. Hi-Med.-Low regulator and safety shutoff. High fire time: 1.5 hrs. on 16.4 oz. disposable cylinder.

Mr. Heater - MH12T - Variable output of 8, 12 & 14,000 Btu. Hi-Med.-Low regulator, safety shutoff and soft nose POL.
High fire time: 30 hrs. (20 lb. cylinder)
Mr. Heater - MH12TS - is an MH12T with electronic spark ignition.

Mr. Double Heater - MH24T - Variable output of 8, 12, 16, 24, & 28,000 Btu. Two safety shutoffs, Hi-Med.-Low regulator and soft nose POL. run one burner or two. For direct connection to 20 lb. cylinder.
High fire time: 15 hrs. (2 burner operation)
Mr. Double Heater - MH24TS - is an MH24T with electronic spark ignition.

Mr. Triple Heater - MH42T - Variable output of 8, 12, 14, 16, 24, 28, 36, & 42,000 Btu. Three safety shutoffs, Hi-Med.-Low regulator with soft nose POL. Run one, two or three burners. For direct connection to 20 - 100 lb. cylinder.
High fire time: 10 hrs. (3 burner operation/20lb. cyl.)

Mr. Heater Standard Replacement Parts

F273116 Safety shutoff valve with orifice - replacement for most Mr.Heater models
F273117 12"' Thermocouple lead - replacement for most Mr.Heater models.
F273164 Grid screen kit - replacement for most Mr.Heater models
F273606 Regulator - replacement for #MH12T, MH14TC, MH24T, MH26TC, & MH42T
F273607 Regulator - replacement for # MH12, MH12C

MR. HEATER PROPANE PATIO HEATER

- Powerful 40,000 BTU Patio Heater
- Quality Stainless Steel Finish - Components manufactured from Stainless Steel to insure years of dependable performance
- Adjustable Bar Table - Exclusive milled finish table turns the heater into an entertainment center
- Innovative Wheel Design - Hide-a-Way wheels make transportation easy
- Controls - Operator friendly; reliable Piezo ignitor; Control knob with high, low, off and pilot positions
- Energy Efficient Design - Generates more heat than competitors with less gas usage
- Variable Heat - Provides maximum comfort
- Designed For Safe Operation - Heater features a Flame Safety Shutoff and Tip Over Switch; Also features a wind resistant pilot light
- Insect Proof - Design eliminates possibility of small insects from entering the gas train and blocking gas flow
- Easy To Assemble - Easy to understand instructions
- Warranty - 1 Year Residential; 90 Days Commercial

MR. HEATER PORTABLE BUDDY

Everybody needs a Buddy sometime. Mr. Heater's Portable Buddy™ radiant heater provides safe heat for chilly garages, tents, patios, porches, cabins, fishing shanties, truck caps, barns - anywhere you want to stay warm. The buddy may also be used inside your home, in case of a power outage. Certified by CSA International, Mr. Heater's Portable Buddy heater uses revolutionary new heating technology to provide safe, reliable propane heat indoors.

- Designed and approved for indoor use.
- Automatic low-oxygen shut off system.
- Uses 1 lb. (or 20 lb. propane cylinder w/optional hose connection)
- Free standing or wall mount
- Quiet, order-free, lightweight, portable
- Easy to carry
- 4,000 to 9,000 Btu. / High & low setting
- Heats up to 200 sq. ft.

Valve position: Pilot, Lo, & Hi.
- 1 lb. cylinder: 3 to 6 hrs.
  20 lb. cylinder: 48 to 108 hrs.
- Overall dimensions: 14"x7"x14"
  Shipping weight: 8 lbs.

NOTE: When using a 20 lb. tank, place cylinder outdoors. Never bring a 20 lb. cylinder indoors. *Not designed for permanent installation or for use above an altitude of 7000 feet.*

Setting the standard in swine confinement heating for more than four decades, L.B. White Classic pilot light heaters offer simple, reliable operation for years of worry-free performance.

Key features for the Classic Heaters Include:
Range of models from 40,000 to 170,000 BTU/HR
Highly effcient, pilot light design
Variable heat output (Classic AS040)
Choice of propane or natural gas
Exclusive Tri-Shield* case protection

*Tri-Shield Coating consists of 3 unique protective layers including non-corrosive hot-dipped galvanized steel, oven cured epoxy primer and a baked thermosetting polyester.

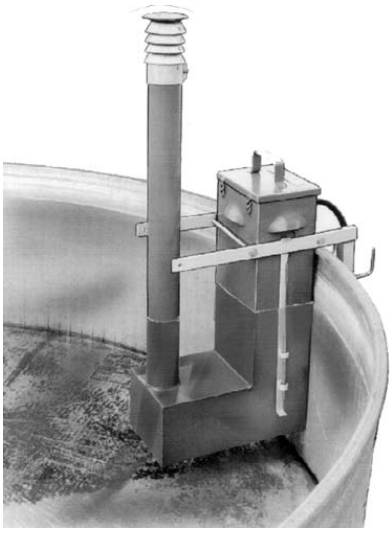
Combustion performance CO (PPM rise) NO2 (PPM rise) CO2 (PPM) Ethylene (PPM)	 1.5 0.4 3.000 0.005	 1.5 0.4 3 0.005
Air temperature rise (Farenheit)	110	120
Minimum clearance (ft.) Top / Sides / Back Blower outlet	 1 / 1 / 1 6	 1 / 1 / 1 6

Designed specifically for heating, the GreenGro's advanced technology saves you 20% in fuel costs while delivering a CO^2 enriched environment that exceeds all greenhouse combustion and safety standards.

GreenGro Plus models offer several extra features for even greater fuel and heat management efficiencies, including: two stage temperature control, heating and air circulation modes and tri-shield triple coated protection against corrosion.

BROYHILL



IBTH354B SERIES

12,930 BTU* Propane

CSA Certified
*Plenty of heat for the average stock tank.

- Installs in minutes, in wood, cement or steel tanks.
- 14 gauge tank heater can wall.
- Throughly tested before leaving the factory.
- Operates on a few cents per day.
- CSA approved automatic shut-off and temperature controls prevent gas accumulations.
- The main heater box is made of heavy gauge steel. It has a built-in baffle, correctly placed air intakes and cover that cannot be kicked off. Has popular Draft King stack cover.
- Automatic controls - The thermostatic gas valve turns the heat on and off keeping the water temperature constant.
- The heating unit is shipped already assembled and factory tested.
- Maintains operation in all types of weather.

TROJAN

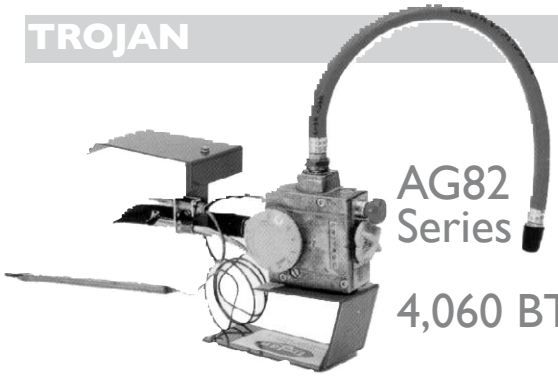
66B Series

12,470 BTU Propane or Convert to Natural Gas

CSA Certified control for safe operation.

This heater performs dependably in hard winter conditions. Fuel it with propane or convert to natural gas. The mounting brackets will accommodate most steel, wood or concrete water tanks. This CSA approved system generates 13,000 Btu per hour. Trojan starts with a long-lasting heavy steel casing and finishes it with a tough, baked-on power coat finish. The control and burner assembly removes easily for service through the hinged cover.

TROJAN



AG82 Series

4,060 BTU

An efficient way to prevent freezing. Mount this unit under livestock waterers. It runs on propane or convert to natural gas, developing 4,060 Btu per hour. An adjustable automatic thermostat permits you to control the temperature for whatever the conditions.

L.B. WHITE REMOTE THERMOSTAT

09454

Remote NEMA 4X (dust & rain tight) thermostat with 20 ft. cord.
Easy to install ~ simply plug in.
Not available for TRADESMAN® 100

ENERCO

The TT-24 is designed to plug directly into a conventional 115/120v outlet. Because 99% of all commercial/industrial buildings have the electrical outlets located approximately 4.5 to 5 feet off the floor, the TT-24 allows total flexibility when installing overhead heaters. Simply locate the outlet closest to the area in which the heater will be installed, run low voltage wiring (thermostat wiring or stranded 18 ga.) from the heater to the TT-24, hook-up the two wires, and plug in the transformer. The transformer has a mounting screw that attaches it to the center screw on the outlet to prevent accidental interruption of power.

(In almost all cases, low voltage wiring does not have to run in conduit)

TT24 Combination Transformer/ Thermostat

SKYTECH

3001 ST

- All battery operated – R.F.
- 1,048,576 security codes
- LCD displays both room & set temp. in F or C
- 9 hour countdown timer
- 24 Hour clock
- Operates as a thermostat
- Wall plate/wall mount bracket

1001 ST

- All battery operated – R.F.
- ON/OFF Control
- 65,536 security codes
- All Skytech batteries and wall clip included
- Receiver with sanp on wall plate and (18") wires with connectors

1001 ST

AMBIENT OPTIONL REMOTE

- Manual on/off remote control
- LCD with clock, back lighting, temperature display, on indicator, and low battery indicator
- Soft-touch finish for comfortable feel
- Childproof protection
- Thermo-safety shut down (Transmitter and Receiver)
- 128 security codes
- K Bracket (black) for easy mounting to gas fireplace, gas stove or gas logs
- Millivolt or 24V compatible

RCM

- 7 day (5/2) Programmable thermostat on/off remote control
- LCD with back lighting, temperature display and setting clock, low battery indicator, on indicator, and count down timer
- Soft-touch finish for comfortable feel
- Child proof protection
- Thermo-safety shut down (Transmitter and Receiver)
- Wall holster for mounting the transmitter to the wall
- 128 security codes
- L Bracket (black) for easy mounting to gas fireplace, gas stove or gas logs
- Millivolt or 24V compatible

RCT

AMBIENT WIRELESS WALL THERMOSTAT

- 7 day (5/2) programmable on/off wall thermostat
- LCD display with temperature, time, "flame on" indicator and "battery low" indicator
- Countdown timer
- Childproof protection
- Thermal-safety shutdown (transmitter)
- 128 security codes & battery receiver

IMPORTANT
INFORMATION

This catalog does not constitute an offer to sell by Bergquist, Inc., or the right to purchase from us.

TERMS

All orders are accepted subject to credit approval. To customers with established credit our terms are Net 30 days from the date of the invoice. A late charge of 1 1/2% per month will be assessed on all past due accounts. If credit is not established all shipments will be COD. Any charges by the transportation company will be the responsibility of the buyer.

FREIGHT

Routing of the shipment will be made by Bergquist, Inc. The customer's routing request will be followed if possible. All prices are FOB the shipping point, which is normally our warehouse. We reserve the right to ship from the manufacturer's factory or other points as needed.

SHORTAGE OR DAMAGE CLAIMS

Claims for shortages must be made within 48 hours after receipt of shipment. Broken or damaged packages must be inspected immediately for damaged goods prior to signing for delivery. Claims of damaged goods should be filed with the delivering carrier. Bergquist is not responsible for products damaged in transit

RETURNS

Bergquist has a no-squabble return policy. We will credit the purchase price for any unused standard stock merchandise. We ask that the merchandise be returned within 30 days, unused, in the original packaging for a prompt exchange or credit. To assure proper credit please call for a Return Goods Authorization Number prior to returning any equipment. All returns are subject to inspection.

WARRANTY

All products purchased from Bergquist, Inc. are subject to the manufacturers' warranty policy. In no case do we assume or admit any liability for labor, damage, leakage of other claims arising from defective goods.

TAXES

No sales or use taxes are included in our prices. Any liability for such taxes is the responsibility of the buyer.

PRICES

Prices are subject to change without notice. Shipments will be invoiced at the price in effect at the time of shipment.

CAUTION

Do not use any product in the catalog for any service other than LP Gas or NH3. If you have a need for use in a different application please call Bergquist.

WARNING

Installation, usage and maintenance of all products sold by Bergquist must be done in compliance with the manufacturer's instructions and applicable federal, state and local standards, codes, regulations and laws. Installation and maintenance should be done by qualified personnel.

The products contained in this catalog are mechanical devices that will eventually become inoperative due to wear, corrosion and other environmental conditions. Periodic maintenance and inspection are required to avoid serious injury and property damage.

Some of the products sold by Bergquist are manufactured to store, transport, transfer and use flammable liquids and gases. These products and the material they handle must by handled by experienced and trained personnel. These personnel should use accepted industry and governmental safety procedures.
